

Another Technology post

Ain't technology grand. Today, I looked at my stats again. I found somebody has accessed this lonely little blog on their blackberry. I've seen people stopping by that use Windows, Macs, Linux boxes and other PC systems, but I don't recall seeing anything from a phone. Amazing. You can now read complete drivels, on the go, with your phone. (yes, I do think this blog is complete drivels, I'm only emptying my brain, I try to keep the good stuff in.)

So for my information, what type of device do you use to blog or read them? I've only used my windows laptop. Multiple Web browsers, but I keep trying new things. Really I just want to know who used the blackberry? Curiouser and curiouser.
