More on Superman...

And then I find this <u>link</u>. An interesting look into the creation of Superman. I will admit that I never looked into the two men that created the Superman character. I knew the names, but never any back story behind it. I guess it never really grasped my interest, but a comic I read started a story line about one of the authors. I'm not sure if anyone here reads <u>Funky Winkerbean</u>, but there is a current story arc about the <u>Seigel home</u>.

All interesting stuff for the 70th anniversary of Superman.

And a special link for a friend about a discussion we had recently. Here it is, <u>Red Son</u>. Have fun, if you find the actual books, let me know....
