

Things I like...

Not quite a list, because my interests are varied, but some of the things I like to do, all G-rated of course. (I have a daughter or two who may read this. Yes, they are all over 16, but they are still my little girls.)

I like insignificant bits of trivial knowledge. The more trivial the better. Knowledge that Diners Club was the first independent credit card (1949) and that is when the middle man started handling our money is interesting. Knowing that it came about because one of the first partners forgot their wallet at dinner is the cake. Knowing that partner was a man named Frank X. McNamara is the icing. Finding out what his middle name was would be, as they say, priceless.

I like reading. Of all sorts, but I tend to read Science Fiction, Fantasy (Swords/Sorcery), Mysteries, and Trivia on the web. Will read almost any well written book. Great rainy day time filler.

Computers... Yep, I can't get enough of them. I work 8 hours a day on them and then I come home and spend free time on them... You would think I would get tired of the little buggers.

Cooking occasionally. There are times when I really want to whip up a special meal, I just don't like doing it everyday. But, you have to eat...

Time spent with friends. I'm glad to say I have a few people in my life, that don't seem to mind having me around. My wife used to call this "Adult Time". Sometimes, I think we adults act a bit like children, but that is part of the fun.

Softball and Baseball. Baseball is the only sport I ever really followed (I played at one time too). No matter how old I get, if I can still swing a bat and toddle down to first

base, I plan on playing softball as often as I can. If I would do it more often, I imagine I wouldn't be as sore the next day...

Theater. In my college years, I never would have thought I would want to get on stage in front of people. Wasn't me at all in my early years. I've had a lot of fun doing my ham-bit on stage.

Science and math. Things that make my logical little brain tick. You've got to keep the gears greased to keep everything running smooth, and that's what the Science and math does for me...

A bit of wood working. I really like destruction the best, but I like using power tools. The smell of cut wood is something too.

And last but certainly not least, I like my family. Every dang one of them. They helped form the person I am today (along with many others I've met along the way) and since I tend to like the person I became, I guess I could thank them once or twice... Nah, it would go to their heads wouldn't it.
