

From old tech to new tech

I was talking today with my 3rd daughter and her husband about movies I have on VHS tapes. They remarked that they didn't have a VCR, so they could not watch those movies. I casually remarked that they needed a USB VHS player. I never saw one, and wasn't even sure if they did make them. Well, I found out that there is at least one company who makes them. So from the company that brought you the usb turntable and the usb cassette player, [ION](#) brings you the VHS 2 PC player. Now you can watch your VHS tapes on your PC. You can also take your home VHS videos and put them on DVD. What more could you want?

□

I didn't see the 8-track to PC player. Or BetaTape to PC? Or Edison recording tubes to PC? Sheet Music to PC? Player Piano sheets to PC? OK, I'm getting silly, but what about the 8-track to PC. I had a few not too many years ago. I gave them to someone with a working 8-track player.

I noticed that they have a turntable that goes directly to an Ipod.

They have a 35mm slide to PC scanner and a few other items. Interesting stuff I ever win the lottery.
