

# working on battery power

I've been having some problem with my laptop's battery. The life I expected just wasn't there. I would like to be able to take my laptop places, sit down for an hour or two, get some work done, or just browse the net. Battery life has been under 1 hour. Sad really. You buy a laptop so you can have freedom to use the computer where and when you want, but you are then limited to finding a electrical outlet to work.

Well, to ease that situation, I was able to get a longer lasting battery (I hope). I've been running on battery power alone for about 20 minutes now. Taking the battery down to 0 will allow my computer to have a better indication of remaining battery life. Right now it says I have over 2 hours remaining. We will see.

still going...

Update when the battery runs out.
