

Great day today!

Today was possibly one of the best days I have had in a long time. It really reminded me why I am most comfortable with kids in 4th-6th grades. The class really went well. Remember the one fifth grade class I talked about in my music entry a few days ago? This was pretty much opposite, more like the two 4th grade classes I had that day. It is really unfortunate I am not so comfortable teaching things like reading and writing. What other career can place me with this age group but not involve standard teaching? Coaching is out of course as I am definitely not sports oriented- speaking of which, did you hear about what boys are doing now for sport in Missouri? Put it this way: it is *illegal* in most states. [Check it out at this link \(click\)](#). Actually, once I saw the video (there is a video at that link, but I'm not sure it's the same one I saw) it didn't seem so bad, which is why I am not telling you what it is and making you go to the link instead. □ The only reservations I have is that they are teaching this to boys as young as six.

Anyway, back to today. I didn't do much teaching this morning, what with computer lab time and art taking up an hour and a half, but what teaching I did I really enjoyed. Following art, they had spelling (still no teaching, but some preparation and study time for their test Friday) and reading. I got to read aloud a book that was actually pretty good, though I didn't like the ending **at all**. It was called [My Brother Sam is Dead](#). With what happened in the chapter I read to the class, one would hope for a miracle to happen in the next chapter, but what happens is really quite sad. I'll leave it a little mysterious in case you want to read it- hopefully I didn't say too much. I don't think I did.

This led us to lunch. After lunch there was just math and science left. For math I got the advanced group with only around 15 students. This group was in the 6th grade book. I

actually almost got through what the teacher expected me to get through. I only needed about five minutes more instead of the typical 15-30 minutes more... For science we talked about energy sources. They had read about fossil fuels and hydropower yesterday, and we picked up with solar, nuclear, and other forms of energy today. It was a good read and discussion. By the time we finished, I was a little disappointed it was time to go home, it was such a good day. Oh well, it couldn't last forever. And tomorrow I've got 7th grade... Well, 7th grade science! I just hope I don't have to show another video like that Al Gore one I showed at this school last time. That was not fun, though not as bad as 7th grade sex-ed I had to do at another school around that same time. ☐
