

A post about a big spider

It is a seasonal thing... I was going to post a news article about a big spider in Australia, but after seeing some of the pictures, I decided not to. If you really want to look it up, it was about a spider the size of a person's hand dining on a bird.

What really interests me is that there are so many different arachnids around the world. I always thought of the tarantulas as the big spiders. The tarantulas are not web weavers in general. But here was a rather large spider in Australia that actually spun a web that caught the bird.

Anyway what caught my attention to this story was the bird being the victim here. If I remember the song correctly the bird ate the spider, after it ate the fly...

Now who started going through the rest of the song???
