

# My Bloody Valentine 3D

It's almost embarrassing to admit that I saw a movie called, "[My Bloody Valentine 3D](#)". But the reason I'm writing a blog about it is because I actually *liked* it. A true slasher film; the grisly violence was excessive. But I actually didn't find myself rolling my eyes at the constant gore fest, which is what I did during the last few movies in the Saw franchise. In the poorer quality Saw movies, some of the violence doesn't really even make sense. It's almost like they're trying to see how far they can go, how shocking they can be, and what they can get away with, even if it's not integral to the plot. My Bloody Valentine 3D actually has a well-developed, interesting plot. If you don't pay attention to the newspaper headlines that *come out of the screen* in the beginning of the movie (very cool 3D effect – definitely more on those later), the plot might actually be hard to follow. I know, a good plot is unheard of for a slasher flick, but I was even left to piece together some plot details after the movie was over. Not that it was *too* hard to follow, just a lot of continuous action that makes it difficult for one to think about character relationships and how they relate to the plot while also watching the movie. So for my best attempt at a plot synopsis, here we go...

Harmony is a small mining town where everyone knows everyone else, and the mine is the lifeblood of the town. The filmmakers very successfully give the audience a good feel for the sleepy little mining town. Decades ago, there was an accident in the mine which was initially blamed on the owner of the mine, Hanniger. When it was found that the victims of the mining accident were actually brutally murdered, it was blamed upon the sole survivor of the accident, Harry Warden, who is left in a coma. A few decades later, he wakes up and slaughters 22 people, including a group of teenagers having a party at the mine. Four of the revelers make it out alive,

and flash forward 10 years to now. Hanniger's son (he was one of the 4 survivors) returns to the town as a new rash of murders unfold, and he finds himself accused of the brutal crimes. There's actually more to it than that, but this kind of gives you an idea about the movie. The plot and direction of the movie allow the audience to never be sure who to suspect of the murders, and there are various twists and turns. Very well done for a horror movie, especially one belonging to the slasher genre. Now on to the 3D effects...

3D does not often work for me because my eyesight is very uneven – I have near perfect vision in my left eye, and terrible vision in my right eye. But I was sure to bring my eyeglasses, which kind of levels the playing field for my eyes, and so when I wore the 3D glasses on top of my regular eyeglasses, the 3D worked very well. I've been to various 3D shows at Disney World and Universal Studios, and I would say those are the best of the best – but even they don't always work for me; sometimes I have to squint to be able to see the 3D. But now it seems there have been some advancements in the technology, and it's clear the movie industry wants to showcase these advancements given the rash of 3D movie previews I've seen in the theaters recently. Among the 3D features that will be out in 2009 are: Monsters and Aliens, Up, Disney's a Christmas Carol 3D, Ice Age 3, and Toy Story in 3D. But anyway, My Bloody Valentine 3D was very cool – the entire movie was actually in 3D for me, and all I had to do was sit there – no fiddling with glasses, no squinting... and that was a first for me. The murderer's weapon of choice is a miner's ax, and there were many times it would actually appear to come out of the screen (along with disgusting bits of gore, of course)! Besides that effect, other things about the movie were cool because of the 3D as well; even scenes that consisted exclusively of dialogue.

As one reviewer on [imdb.com](http://imdb.com) mentioned, My Bloody Valentine 3D does not take itself too seriously – and that's a good thing.

In fact, a few months ago when we first saw the movie's preview and tagline "Nothing says 'date movie' like a 3D ride to Hell!", we thought it was a joke... you know, one of those "previews" that actually ends up being a commercial. But it was for a real movie, and so we couldn't resist venturing to the big city to utilize a free voucher we had gotten on a previous visit to see the otherwise expensive 3D ride to Hell. If you are a fan of horror movies, My Bloody Valentine 3D is a must-see. I'm not sure how this movie would translate to a regular screen. It might still be a good horror movie, but given the 3D effects, it was nothing short of awesome! I would almost classify it as a sort of haunted house experience, except you're sitting in a seat and not walking around. If you look at it that way, the \$13.50 price tag (\$11 matinee) would be a bargain for the over 90 minute experience compared to admission at most haunted houses. Of course, haunted houses don't have the extra-long, very gratuitous nude scene, which I could have definitely done without, but since that's my only complaint about the movie, overall I would definitely consider it an afternoon well-spent with hubby (no we did not take the kids to this feature!) After all, nothing says 'date movie' like a 3D ride to Hell! Apparently so!

# Happy New Year!

Happy New Year! Holy cow, 2009 already! I hope you had a good New Year's. Ours was wonderful. We hosted a bash, which is always great so that we don't have to pack up the kids and all their luggage just to haul them out somewhere to stay until the wee hours of the morning. We played charades and other games and ate lots of yummy treats. Our kids – #2 and #4 in birth order – fell asleep way early. The older one stayed asleep all night, but wouldn't you know it – the baby woke right as we crawled into bed at 4 in the morning. I was able to sleep for a few hours, but that's more than I can say for my husband who woke with the baby. But then he got a short nap while I ambled downstairs to do some much needed cleanup from the party. After that, we were ready to drag ourselves over to a friend's house for a New Year's Day chili feast – I'm told the beans bring good luck in the new year. More food, more fun, and we didn't plan on staying long but ended up getting home about 7 in the evening. I did miss the hockey game at Wrigley Field, but the Red Wings beat the Blackhawks anyway. I'm not a big hockey fan; I just thought it would be cool to see Wrigley all decked out for hockey. I wonder what they would have done if they had gotten some of that freak 60 degree weather again – how to maintain an ice rink in those conditions? Oh well, that's a tangent, good thing this site is called tangents.org

So the chili and rest of the food at our friends house was great, but I wish I could have enjoyed it more – seems I partied a little too hard the night before and felt a little tired and queasy come chili feast time. But it's my own fault – I should know that I'm getting older and can't handle the late nights (or early mornings for that matter) like I used

to. But oh well – my friend did give me some delicious chili to take home, so hopefully it will be more enjoyable now that I was able to rest last night. Now I'll just have to get used to writing 2009 instead of 2008 all over the place...

## **Last Post of 2008!**

Because I barely have time to fit in the writing of this current blog post, I can safely say that with 4 kids running around (Christmas break = parental nightmare) this will be my last blog post of 2008! What better way to go out then but to experiment with the new polling feature of tangents.org and make a New Year's themed poll? Enjoy, and have a very happy and safe New Year's celebration! Here's wishing you the best of luck in 2009! Check all that apply:
