Remind me again, why do I like computers?

I had to re-install windows on my laptop today. Now I have to make sure that everything that should be working is. Then there are some other programs I use that will need to be re-installed. This machine is getting older, so I may have to shop for a new hard drive soon. Seems like there are more 'bad' sections recently. I'm glad I backup my data files with some regularity. I would hate to lose pictures of my kids, grandkids, weddings, and other fun occasions.

The bigger problem is the small fact that I have a lot of computers in this house. It seems like I was re-installing some operating system just last week. Oh, I was, it was on my 'play' machines where I keep installing different versions of Linux.

I have noticed one thing, my touch pad seems to be a bit more sensitive. I keep having my cursor jump all around the screen as I type this. I've had to go back and correct mistakes as the cursor jumps to places earlier in this post. I need to check that out too. Grumble….

Oh well, I got the sound to work again….. Now if I can just find my CD with 100 card games on it….
