

From old tech to new tech

I was talking today with my 3rd daughter and her husband about movies I have on VHS tapes. They remarked that they didn't have a VCR, so they could not watch those movies. I casually remarked that they needed a USB VHS player. I never saw one, and wasn't even sure if they did make them. Well, I found out that there is at least one company who makes them. So from the company that brought you the usb turntable and the usb cassette player, [ION](#) brings you the VHS 2 PC player. Now you can watch your VHS tapes on your PC. You can also take your home VHS videos and put them on DVD. What more could you want?

□

I didn't see the 8-track to PC player. Or BetaTape to PC? Or Edison recording tubes to PC? Sheet Music to PC? Player Piano sheets to PC? OK, I'm getting silly, but what about the 8-track to PC. I had a few not too many years ago. I gave them to someone with a working 8-track player.

I noticed that they have a turntable that goes directly to an Ipod.

They have a 35mm slide to PC scanner and a few other items. Interesting stuff I ever win the lottery.

Another Technology post

Ain't technology grand. Today, I looked at my stats again. I found somebody has accessed this lonely little blog on their blackberry. I've seen people stopping by that use Windows, Macs, Linux boxes and other PC systems, but I don't recall seeing anything from a phone. Amazing. You can now read

complete drivel, on the go, with your phone. (yes, I do think this blog is complete drivel, I'm only emptying my brain, I try to keep the good stuff in.)

So for my information, what type of device do you use to blog or read them? I've only used my windows laptop. Multiple Web browsers, but I keep trying new things. Really I just want to know who used the blackberry? Curiouser and curiouser.
