

You are what you eat?

Well, I am no stranger to trying new and, what for some would be, exotic foods. I generally enjoy trying new things to eat, even when I don't enjoy the taste. There have been a large number of foods that I really like, that if I had failed to try, I never would have known the taste sensations.

From A (for Ants), to Z (normal zoo animals – Hippo and crocodile), I have tried many different foods. Other than zucchini, I can't really recall any Z foods, maybe someone could enlighten me. After the [extreme recycling](#) I wrote about I didn't think I could see an article about food that would just turn me off. But I found one. The problem for me is that I have tried almost everything else, why wouldn't I try this. I have eaten bugs, so why not [rats](#)? I guess that would be one way to make sure the rat population stays in check. They would no longer be just pests, but a food source. Maybe I'll have to try some... Can't be any worse than squirrel can it? After all a Squirrel is just a rat with a fuzzy tail right?
