

Computers, sometimes I just hate them.

Over the weekend I was updating the hardware on one of my computers. While I had the case open, and my hands busily putting in many different parts, my daughter told me that the family computer wasn't working. Grumble Grumble. I seeing it I thought that the video card was a goner. It looked like the hard drives were still working, the key pad would display the proper lights when hitting the NumLock and ShiftLock keys. So I took out the card and swapped it with another. Still nothing. I think after 2 1/2 days of tinkering with the stupid machine, I found the problem to be a bad install of DirectX. Grumble, it wasn't the hardware at all.

Why don't I just use linux????
