

Hooked on Foniks

The English language is a glorious hodgepodge of a variety of mother tongues. There are bits of Welsh, Dutch, German, French, Spanish, Italian, Latin and a bit of original English in this language. This is why there are so many ways to spell the same sounds. That and of course people would always spell the way they wanted to before dictionaries were invented. ☐

Since I have a very hard time remembering how to spell certain words, I am in favor of scrapping the current way of spelling things and coming up with an alphabet that allows us to spell words the way they sound.

I'm sure we could get rid of the C, Q and X. These can be replaced by S, K, KW, KS and EKS. Should there be multiple letters for the long and short vowel sounds? What about those the Th and Sh sounds? New letters? Maybe. The easiest to teach would be 1 letter per sound. If we keep everything close to the current looks of the alphabet, it would be easier to learn than the metric system. ☐ Just think no more I before E except after whatever... No wondering if that was spelled with a C or an S or maybe a K. What are we waiting for. So to experiment, I give you the following (long vowel sounds will be replaced by double vowels and the Th and Sh and Ch will remain – No new letters on this keyboard.)

II was up laat tuuniit beekuz II fel asleep direeng aa balgaam. II wook up direeng thu last ineeng. The Tiigers won. If thaa win tuumoroo, thaa wil bee the Sentral leeg champs. Goo Tiigers!!

Dang, that was difficult to type. Maybe the learning curve is steeper than I thought... ☐
