## ringtones?

On my last phone I could set ringtones for each caller if I wished. I could also download ringtones (usually for some nominal cost, but I never did that). On the new phone I can make my own ringtones. I can record something and set that to be a ringtone. Bits and pieces of MP3 files can become ringtones. The only limitation I can see is my very fertile imagination and the time I would need to spend on each ringtone.

I thought of recording each daughter saying "Hey Dad it's me.", but then I remembered that over the phone they all have similar vocal characteristics. I could record myself telling me which daughter is calling, but then anyone within earshot would know which daughter is calling me. Interesting concept, but not enough imagination yet.

I guess I could do my Stitch or Bullwinkle impersonations and make a slightly different message for each daughter. Maybe, maybe???

I could find bits of their favorite songs and set those as ringtones. One daughter is very, very easy to pick — Anything Star Wars or Frogs. I don't think I've heard any phone that rings with a Bullfrog croak. Dogs barking for the young Vet Tech student?

Something that sounds tropical for the daughter in Florida? Or maybe the sound of a zoo, since I hear she has the start of one. And the oldest, hmm?? I will need to think on that one.

I currently have some picked out, so I can recognize some of my callers, but what about friends? Should each friend have their own ringtone? Should I group some friends together? Group my work contacts together? Have some annoying default tone for anyone not on my contact list? The choices seem to be endless, but I will get tired of this soon.

Do you want to have you're own ringtone. What would it be?
