# Zack And Kelly Having A Baby?

Do you remember the *extremely cheesy* Saturday morning kids' sitcom on NBC called Saved by the Bell?  The show saw the beginning of the careers of famous now-adult actors and reality show hosts Mario Lopez, Mark-Paul Gosselaar, and Tiffani-Amber Thiessen.

I used to watch Saved by the Bell every week, and I caught every episode at least once again in syndication.  There was at least one spinoff: Saved By The Bell — The College Years, and a few made-for-tv-movies that followed the exploits of the Bayside High School crew.  In one of the movies, that famous on-again, off-again couple from the show, Zach and Kelly (played by Gosselaar and Thiessen) were united in holy matrimony…  I didn't know that, since I was only interested in the original show, not so much the spin-offs or updates.

Sometimes I peruse the celebrity gossip (and sometimes current events info) site tmz.com, especially lately when they've been reporting a lead in the Stacy Peterson case (a missing woman from the Chicago area whose case I've been following because I used to live in the area).  For their part, tmz.com seems to have quite accurate info and usually has it much earlier than other news outlets.  So the other day, I noticed a headline on Tmz saying that ["Kelly" — aka Tiffani-Amber Thiessen — is pregnant and looking ready to pop](), as they say.  At the bottom of that article, there was a link to another Saved by the Bell story:  [Zach Morris and Kelly Kapowski — Back Together!]() If you click the link, you'll find that the Saved by the Bell actors were out and about together in NYC in September.

Interesting…  wasn't September about 9 months ago?  An interesting footnote to this story is that I read that Mark-Paul Gosselaar was divorced from his wife only weeks ago.  So are Zach and Kelly from Saved by the Bell having a baby together?  Did you read it here first?  Most importantly, will

the actors continue their name-hyphenating tradition when they name the baby?  How about Saved by the Bell — The Baby Years?  Stay tuned…
